Sarboxylesterase (EC 3.1.1.1) ES-4 precursor, liver - rat
Carboxylesterase (EC 3.1.1.1) ES-4 precursor, liver - rat
NiAlterante names: hydrolase B
C.Species Rattus norvegicus (Norway rat)
C.Date: 28-Oct: 1996 Headquence revision 13-Mar-1997 #text_change 18-Jun-1999
C.Accession: S62788; 551203; Ä55304; 54927

-!- SUBUNIT: Homotrimer.
-!- SUBCELLULAR LOCATION: Endoplasmic reticulum lumen.
-!- SIMILARITY: Belongs to the type-B carboxylesterase/lipase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      28 LCWSLTLCLMAQTALG-----ALHTKRPQVVTKYGTLQGKQMHVGKTPIQVFLGVPFSR

Robbi M., Beaufay H.;
"Cloning and sequencing of rat liver carboxylesterase ES-3 (egasyn).",
Biochem. Biophys. Res. Commun. 203:1404-1411(1994).
-!- FUNCTION: Involved in the detoxification of xenobiotics and in the
activation of ester and amide prodrugs.
-!- CATALYTIC ACTIVITY: A carboxylic ester + H(2)O = an alcohol + a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      241 HKAISESGVALTAGLVKKNTRPLAEKIAVVSGCKSTTSASMVHCLRQKTEEELLETTLKL

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              novel putative carboxylesterase.";
Biochim. Biophys. Acta 1207:138-142(1994).
-!- FUNCTION: Involved in the detoxication of xenobiotics and in the activation of seter and amide prodrugs.
-!- CATALYTIC ACTIVITY: A carboxylic ester + H(2)O = an alcohol + a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          endoplasmic

J. Biol. Chem. 262:15316-15321(1987).
-!- FUNCTION: Involved in the detoxification of xenobiotics and in the activation of ester and amide prodrugs.
-!- CATALYTIC ACTIVITY: A carboxylic ester + H(2)O = an alcohol + a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | ::: |:||| | : | |::::::|

Gilbert M., Smith J., Roskams A.J., Auld V.J.;

Gilbert M., Neuronal cell surface protein thought to be involved in - FMNGTION; Neuronal by forming intercellular junctions through binding to beta-neurexins. Seems to play role in formation or maintenance of synaptic junctions. In vitro, triggers the de novo maintenance of synaptic structures (By similarity).

Formation of presynaptic structures (By similarity).
